

Personal Supply Notes

Filters running short. Tubing is whistling again. Restwell says a signature packet went out but I do not recall signing anything.

If the order is the normal cushion/filter cycle, fine. If they added the heated tubing early I need to see the cost before anything ships.

REMINDER — Do not forward any CPAP or supply information to dispatch or to Mike. He only needs to know if delivery timing conflicts with a haul window, not the medical detail.

Note scanned from passenger-seat notebook. Blue ink, slanted hand.
